Une generation en action

About Energy Generation

Energy Generation est une organisation panafricaine qui encourage les jeunes Africains à relever les défis les plus pressants de leur génération (énergie, agriculture, santé, etc.) à travers l'entrepreneuriat et la technologie.

Energy Generation vise à soutenir et à promouvoir les innovations technologiques et entrepreneuriales afin d'identifier, de développer et de diffuser largement les solutions pratiques « made in Africa ».

Mais avant tout, Energy Generation est une plate-forme centrée sur l'humain qui offre aux individus des possibilités de libérer et d'exprimer toute leur créativité positive.

MISSION & VISION

At Energy Generation we are convinced that African youth have the potential to solve the most pressing challenges of their generation (access to clean and sustainable energy, food security and access to health for all), in one generation. We want to encourage entrepreneurial projects led by young Africans and promote innovative technological solutions "made in Africa" and adapted to the continent.

IMPACTS

- ENTREPRENEURSHIP
- ACCESS TO ENERGY
- EDUCATION

OUR BUSINESS SCHOOLS

Our Business Schools are places where theory meets practice in order to turn innovative ideas into viable businesses.

As a student you will follow an outstanding entrepreneurial degree course and will have the opportunity to learn from the experience of field professionals from world leading compagnies in their sector.

While at the Business Schools you will have the opportunity to develop your prototype in our equipped lab and will benefit from personalised coaching to structure your entrepreneurial project.

Business & Energy School

SOLAR ENTREPRENEURSHIP TRAINING

As solar represents a real **opportunity to create jobs for young people** while participating in the socio-economic development of African rural areas in particular, Energy Generation has created a ten-month programme aimed at training and supporting solar entrepreneurs.

Whatever level of education you are currently in, the Solar Entrepreneurship Training offers you a **tailor-made program** to guarantee you a training and support system that perfectly meets your current needs and your future plans.

Solar Trainning

THE ENERGY SPACE

– INCUBATOR & SEED FUND–

The Energy Generation Incubator and Co-working space hosts promising start-ups in the field of energy, and more.

The incubation services include personalized coaching, training and mentoring, as well as support on the startup's day-to-day activities and challenges.

In order to support the development of an international entrepreneurial ecosystem, the incubator will welcome projects from the Business & Energy School but also several projects from diverse backgrounds and African countries.

Lead the change

Business & Energy School

International Bachelor & MBA programs

> **In 30 years, Africa will be the youngest continent in the world, so the youth of today have to be aware of the energy issues and take action to be the leaders that the world will need tomorrow.**
>
> Astria Fataki, President & Founder of Energy Generation, ESI Africa

The Business & Energy School trains Africa's leaders of tomorrow in the fields of energy, technological innovation, and entrepreneurship.

By joining our Pan-African school, you will obtain an internationally recognized diploma while participating in the continent's energy transition through an innovative entrepreneurial project.

Benefit from a program based on a holistic approach

1. A training course developed in partnership with Ascencia Business School, a member of Collège de Paris, to acquire strong business management and project management knomwledge.

2. A unique programme, based on MIT's Design Thinking method to develop your Minimum Viable Product from a technical (prototype) and commercial (business model) point of view.

3. An opportunity to obtain funding designed specifically to support the initiation and large-scale marketing of your project through the Energy Generation Seed Fund.

ADVANCED PROFESSIONAL DIPLOMA
Certification title : **Sales Administration and Business Relationship Manager (1)**

APD Brochure

BACHELOR

Bachelor Brochure

MBA
Certification title : **Management and Business Strategy(2)**

MBA Brochure

The Business & Energy School trains you to become an entrepreneur in the renewable energies field in Africa.

Whatever your current level of education, the Business & Energy School offers you a training program adapted and designed to accompany you to the next level.

Our programs are delivered in French on our campus in Lomé (Togo), and in English on our campus in Accra (Ghana).

1) Certification registered on the National Directory of Professional Certification (RNCP) by Decree of February 23rd 2017 in the Official Journal of March 3rd 2017
(2) Certification registered on the National Directory of Professional Certification (RNCP) by Decree of July 7th 2017 in the Official Journal of July 19th 2017

A practical and professionalizing training

Each year Energy Generation has the honour of welcoming experienced professors and trainers as well as speakers from leading global energy companies such as ENGIE,Schneider Electric or EDF.

Passionate about the issues related to socio-economic development in Africa, entrepreneurship, innovation and thanks to their willingness to transmit their knowledge, they allow our School to propose a world-class teaching staff capable of training the leaders of tomorrow's Africa.

Whether through lectures, practical and supervised work, or personalized support for the development of your technical solution and business, our teaching team will be omnipresent to support you throughout your studies and on all aspects of your entrepreneurial project.

Our speakers

Apply to the Business & Energy School!

Our ambition is to provide excellent training to the brightest and most innovative minds across the continent who want to have a real positive impact on Africa's development.

Our selection process is particularly demanding. Although academic and professional backgrounds are considered, we pay particular attention to the candidate's personality and motivation.

1. Pre-registration
Let's get to know you!
Fill out the pre-registration form to receive more information about the program that suits you best.

2. Application
The application file consists of:
- Your Curriculum Vitae
- A copy of your last diploma and your last transcripts
- Information details of a person willing to support your application
- Short reflection essays

3. Selection
After studying the application files, the pre-selected candidates will be invited for a second selection phase during which they will have to:
- Share a short presentation video
- Pass a logic test online.

4. Admission
Applicants selected at the end of this selection process will be invited to complete the registration procedures.
The next academic year will start in **January 2022**

HELP LEAD THE CHANGE

TAKE PART IN OUR ENTREPRENEURS' SUCCESS STORIES

At Energy Generation, a mentor brings a critical view to, challenges ideas and gives benevolent advice to the entrepreneurs on their project. The mentor transmits his business leader's knowledge and experience in a proactive way.

He or she can be brought, when possible, to make use of any mean necessary (contacts, networks, resources...) to help at best the growth of the startup.

Under no circumstances does the mentor have a decisional power over the direction of the startup.

LEARN MORE ABOUT THE ROLE OF A MENTOR

BECOMING A MENTOR — Sharing your expertise !

Mentors are enthusastic and voluntary people with a great abilities to listen, discuss and be creative. Their main role is to build a trustworthy relationship with the entrepreneurs.

Become Mentor

To be a mentor, you must :

- Have at least 5 years of professional experience or a relevant entrepreneurial experience
- Be receptive, enthusastic and willing to share your abilities and experienc
- Be available for working sessions at least once a month and for a 6 months period

NB : The mentorship activity is to be carried in a volunteer way, as no remuneration is pianned for the mentors.
